memo

the 1990s, the number of people in the UK who are aged 65 and over has increased from 10.5 million to 13.5 million (15.5% of the population).

There is a growing awareness of the need to address the needs of older people, and the Government has set out a strategy for the 21st century in the White Paper on *Ageing Better: The Government's Strategy for Older People* (Department of Health, 1999). This strategy is based on the following principles:

- (i) older people should be able to live independently and actively in their own homes;
- (ii) older people should be able to live in their own communities;
- (iii) older people should be able to live in their own homes and communities for as long as possible.
